

**Sterigenics' Statement on South Coast AQMD Petition for Stipulated Abatement Order  
07/26/22**

“Sterigenics is confident in the continued safety of our employees and the surrounding community. We have reached agreement in principle with SCAQMD, under which both parties support the plan for Sterigenics’ implementation of additional protection measures to further enhance our already safe operations. In its petition, SCAQMD reiterated that its findings indicate the facility is not a risk to nearby residents. We are committed to continuing our record of longstanding compliance with regulatory requirements and safely fulfilling our critical role in safeguarding public health through the sterilization of over 45 million essential medical devices and supplies at our Vernon facility each year.”
